

## **Operational Policy**

We take pride in designing and manufacturing equipment and systems that meet the requirements set by legislation, the authorities, our customers and the environment. Our goal is to be the most esteemed and sought after supplier in our market area.

In order to reach this goal:

1. We are committed to continuous improvement, prevention of environmental pollution, improvement of occupational safety and fulfilment of requirements in matters related to quality, occupational safety and the environment, as set by both our company and our customers;
2. The company management is in charge of developing the organisation and competence of personnel for the attainment of objectives;
3. Each company employee is obligated to do his/her best to ensure that customer requirements are understood and that they can be fulfilled;
4. Each company employee carries his/her own share of responsibility for the fulfilment of environmental objectives and obligations as well as the quality of his/her own work and occupational safety, follows common procedures, further developing both these and his/her own competence;
5. In choosing our cooperation partners, we ensure that their mode of operation, products and services are compatible with our company's quality level and that they meet the other set requirements with environmental and occupational safety consideration;
6. In all of our operations, we strive to burden the environment as little as possible. We develop our products and modes of operation by taking into account the environmental aspects.

Good cooperation and continuous improvement aim for flawless deliveries, effective operation, environmental consideration, a safe working environment and satisfied customers.

By operating profitably in the manner described above, we are ensuring the continuity of our company's operations.
